Desired travel time to work: any

Work experience — 4 years 7 months

July 2025 — till now
1 year 2 months

Carplus

Tashkent, carplus.co.uk/
Automotive Business
• Financial Services (Captive Banks and Leasing Companies)

Full-stack developer

I built the frontend myself for the company's main site — carplus.co.uk — as well as pcp.carplus.co.uk, coversimple.co.uk, carboom.co.uk, and a dozens more.

Here my level rose in Next.js, Hono, Bun, deployment, Telegram bots, Telegram Mini Apps, and other tech. I also levelled up on a 500+ page site, A/B testing, SEO, working with AI agents, marketing, and working with large datasets.

Carplus is one of the UK's leading brokerage firms in car finance (auto credit / leasing). It is not a direct lender — it sits between the buyer and financial institutions (banks / creditors).

I joined Carplus on a Full-stack vacancy, but in practice I worked mainly on frontend. For the whole time I was the company's primary frontend developer.

April 2022 — September 2025

Transoxania Technology Solutions

Tashkent, www.transoxania.uz/
IT, System Integration, Internet
• Software Development

Full-stack developer

This is where professional web work began. When I joined Transoxania my knowledge was only theoretical — I had no experience with large apps. Over three years I learned a great deal.

Sometimes Frontend, sometimes Backend, sometimes other roles. I worked on dozens of web projects in Node.js, React, Next.js, Express.js, TypeScript, JavaScript, and other languages / frameworks.

I picked up skills across every stage of building web apps: authentication / authorization, social login, role management, geolocation, file handling, payment integrations (Click, Plum), designing the database entity model, government APIs and other external APIs, deployment, Jira / Bitbucket, publishing npm packages — and many more processes and technologies.

I learned to hunt for solutions both alone and in a team, to do code review, to design algorithms. You can check that on GitHub and LeetCode.

Digitalgov Innovation Hub

Tashkent, digitalgov.uz/

Educational Institutions

- Training Companies
- Professional Development, Retraining

Mentor

I taught school teachers a course in C++ and the basics of programming.
I was hired on a one-month contract. Unfortunately, the lessons were only planned for a single month.
